

**CMPSC 480**  
**Software Innovation 1**  
**Fall 2019**

ASSIGNMENT 11:  
*The Post Mortem*

**Point value:** 20 pts.  
**Assigned:** 4 December, roughly halfway through class  
**Due:** 16 December, 11 A.M.

## Objective

As the nature of code and web portfolio projects is always in some state of flux, I ask you to reflect at length on your semester's work in portfolio building and professional skill development as a final assignment in this course.

## Goals

- To reflect on processes and products
- To describe the final quality of products developed in the course and future plans for them
- To create a list of future goals or enhancements for your code or web projects for their life after this course

## Assignment Activity & Required Deliverables

- A complete response to the questions contained in the `reflection.md` file located in the `writing` directory of this repository. In this context, take the word *complete* to mean that:
  - All questions have answers which demonstrate detailed, insightful responses
  - Responses make an honest effort to forecast the ways in which you will need to update or change your projects as your career trajectory progresses

## Evaluation

This assignment will be evaluated using the following criteria:

- Submission contains appropriate number of documents as described in the **Assignment Activity & Required Deliverables** section.

## Turning in the Assignment

Submit required deliverables using the GitHub repository for this assignment.
